

Reams Asset Management Intermediate Fixed Income

Investment Philosophy

Reams defines risk as permanent loss of principal or the inability to meet investment objectives. This is distinct from other investors who may define risk as volatility or tracking error versus a benchmark. Another differentiating feature is that Reams focuses on reacting to relative value opportunities and taking advantage of volatility, rather than relying on economic forecasting and predicting market movements. These guiding beliefs lead the team to:

- Focus on long-term value and total return
- Employ both top-down macro and bottom-up strategies to uncover unique opportunities
- React opportunistically to valuation discrepancies and volatility in the bond market
- Create diversified bond portfolios in an attempt to outperform over a full market cycle
- Seek opportunities to add value in niche parts of the market overlooked by larger managers

Strategy Overview

- The standard benchmark is the Bloomberg U.S. Intermediate Gov't/Credit Index (other benchmarks may be utilized for separate accounts according to client-specific guidelines).
- Invest tactically across all sectors of the fixed income market including investment-grade and high yield credit, governments, agencies, mortgage-backed, asset-backed and non-dollar.
- Actively manages overall portfolio duration based on market conditions, normally within a range of 2.5 to 5 years.
- May use derivative instruments such as futures, options and credit default swaps, if explicitly authorized by client guidelines, in order to gain exposure and manage risk.

Investment Process

Step One: Duration and Yield-Curve Decision

Goal: Determine whether the bond market is cheap or expensive

- Emphasize real interest rates and formulate a long-term view
- Take advantage of yield curve opportunities

Step Two: Sector Decision and Bond Selection

Goal: Identify bonds with the highest risk-adjusted returns

- Focus on over/underweight sectors based on relative value and select bonds expected to perform well in dynamic interest rate and credit environments
- Focus on senior positions within the capital structure and use stress testing/scenario analysis to evaluate potential outcomes

Step Three: Risk Analysis and Control

Goal: Continually measure and control exposure to key risk factors

- Employ external and proprietary analytical tools to manage and control risk at security, sector and portfolio levels
- Avoid backward looking risk measures and "risk budgeting" approaches to portfolio construction

Total Strategy Assets

\$2,139.3 million

Portfolio Management Team

Mark Egan, CFA

Lead Portfolio Manager

- Joined Reams Asset Management in 1990
- 39 years of investment experience

Todd Thompson, CFA

Total Macro	0.17
Sector Allocation	-0.08
Security Selection	0.06
Total Selection	-0.02
Fees	-0.06%

Contributors / Detractors

- The strategy's longer duration positively impacted performance, which was minimally affected by its curve positioning.
- The overweight to investment-grade (IG) corporates was the largest detractor as spreads widened during the quarter.
- The overweight to asset-backed securities (ABS) detracted from performance.
- The continued focus on higher-coupon agency mortgage-backed securities (MBS), which prevailed over lower-coupon securities, contributed to performance, although it was somewhat offset by security selection within non-agency MBS.
- The defensive focus in all corporates contributed to performance.
- ABS with attractive embedded options also continued yielding positive results.

Contribution to Excess Returns (Basis Points)

Trailing 3-Year Period (net of fees, annualized)

Trailing 10-Year Period (net of fees, annualized)

Performance data quoted represents past performance. Past performance is no guarantee of future results. Performance figures are stated as gross and net, which is calculated using the highest management fee of 0.25% for this strategy. The firm's management fees are detailed in its Form ADV Part 2A. Please see the Disclosures for further information. Totals may not equal due to rounding. Please see the back page for further information. Unless otherwise stated, index returns represent total return (TR).

BBB	9.9	14.7
Below Investment Grade	0.1	0.0
Cash & Equivalents	3.2	0.0
Total	100.1	100.0

Positioning and Rationale

- The allocation to agency residential mortgage-backed securities rose while non-agency MBS also saw a smaller increase.
- Exposure to IG corporates increased marginally as credit spreads widened during the quarter, improving their relative value. IG remains overweight relative to the index.
- Utilities remain an area of focus within IG corporates, and industrials and financials ended the quarter at marginal overweights relative to the index.
- ABS exposure fell during the quarter.
- The weight in commercial mortgage-backed securities increased marginally, but it ended the quarter at a continued low absolute exposure.
- The allocation to U.S. Treasuries declined, moving further underweight relative to the index.
- The strategy's duration, which is approximately half of a year greater than that of the index, reflects real rates that are attractive on a long-term basis.
- Yield curve exposure at the end of the quarter featured overweights to the 3- to 5-year and 7- to 10-year duration segments, which was offset by underweights to the 1-to 2-year, 2- to 3-year and 5- to 7-year duration segments.

(1) Sector and Quality Exposure may not sum to 100% in some cases. To the extent derivative instruments are held and shown at full notional, collateral will be assigned to its defined Sector or Quality Exposure. Cash & Equivalents may include securities with an effective duration less than one year and rated investment grade.

(2) The bond quality ratings indicated are assigned by credit rating agencies Standard & Poor's, Moody's, and Fitch as an indication of an issuer's creditworthiness. Unless specified by client investment guidelines, the middle of three or highest of two credit quality ratings available from these rating agencies is used. Credit quality is subject to change. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the appropriateness of securities or the appropriateness of securities for investment purposes, and should not be relied on as investment advice.

The information provided is based on the aggregate characteristics of all securities held in a representative portfolio as of the date listed. The data provided in this report is for informational purposes only and should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any of the holdings discussed were or will prove to be profitable. Holdings may change daily and may vary among accounts. Data is obtained from third party sources and is believed to be accurate and reliable.

Disclosure

The Intermediate Fixed Income Composite invests primarily in investment grade securities, while maintaining an average portfolio duration of generally between two and a half to five years. The Bloomberg U.S. Intermediate Government/Credit Index is an unmanaged index comprised of US Treasury notes, federal agency bonds, US corporate debentures and dollar denominated foreign issues with maturities ranging between one and ten years. The eVestment U.S. Intermediate Duration Fixed Income Universe consists of U.S. fixed income products that primarily invest in high quality debt (as rated by Moody's or Standard & Poor's) with an emphasis on bonds with an intermediate duration. The expected benchmarks for this universe would include the Bloomberg Interm. Gov't/Credit, or Bloomberg Interm. Aggregate. Managers in this category will typically indicate a "Fixed Income Style Emphasis" equal to Gov't/Agency Only or Core and a "Product Duration Emphasis" equal to Intermediate.

Historically, bonds have provided less volatility and less risk of loss of capital than has equity investing. However, there are many factors which may affect the risk and return profile of a fixed income portfolio. The two most prominent factors are interest-rate movements and the creditworthiness of the bond issuer. Investors should pay careful attention to the types of fixed-income securities which comprise their portfolio, and remember that, as with all investments, there is the risk of the loss of capital.

Mortgage- and Asset-Backed Securities are subject to prepayment risk and the risk of default on the underlying mortgages or other assets. Foreign investments present additional risks due to currency fluctuations, economic and political factors, government regulations, differences in accounting standards and other factors.

Bonds issued by the U.S. Government have significantly less risk of default than those issued by corporations and municipalities. However, the overall return on Government bonds tends to be less than these other types of fixed-income securities.

eVestment, a Nasdaq platform, collects peer ranked, institutional investment data and information from active institutional managers, investment consultants, plan sponsors, asset managers, and other similar financial institutions and are believed to be reliable sources. Scout Investments claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Scout Investments has been independently verified for the periods 2000-2023.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The verification and performance examination reports are available upon request.

Prior to being acquired by Scout Investments, Reams Asset Management's compliance was verified for the period 1987 through 2009 by Ashland Partners & Company LLP. The verification and performance examination reports are available upon request.

Scout Investments, Inc. is a registered investment advisor that offers investment management services for both managed accounts and mutual funds. Scout Investments is a wholly owned subsidiary of Raymond James Investment Management, which is in turn a wholly owned subsidiary of Raymond James Financial. Reams Asset Management is a division of Scout Investments. The firm was previously defined as UMB Institutional Asset Management, a subsidiary of UMB Bank, which managed both institutional and high net worth, trust, and estate assets. On July 1, 2009 the firm transitioned from UMB Bank and became a subsidiary of UMB Financial Corporation in order to focus on institutional investment management. On November 30, 2010, the firm acquired the advisory business of Reams Asset Management, LLC. On December 28, 2010 the firm changed its name from Scout Investment Advisors to Scout Investments. On November 3, 2017, Scout Investments was acquired by Carillon Tower Advisers. On October 1, 2022, Carillon Tower Advisers began doing business as Raymond James Investment Management.
