

Reams Intermediate Fixed Income Strategy

Investment Philosophy

Reams defines risk as permanent loss of principal or the inability to meet investment objectives. This is distinct from other investors who may define risk as volatility or tracking error versus a benchmark. Another differentiating feature is that Reams focuses on reacting to relative value opportunities and taking advantage of volatility, rather than relying on economic forecasting and predicting market movements. These guiding beliefs lead the team to:

- Focus on long-term value and total return
- Employ both top-down macro and bottom-up strategies to uncover unique opportunities
- React opportunistically to valuation discrepancies and volatility in the bond market
- Create diversified bond portfolios in an attempt to outperform over a full market cycle
- Seek opportunities to add value in niche parts of the market overlooked by larger managers

Strategy Overview

- The standard benchmark is the Bloomberg U.S. Intermediate Gov't/Credit Index (other benchmarks may be utilized for separate accounts according to client-specific guidelines).
- Invest tactically across all sectors of the fixed income market including investment-grade and high yield credit, governments, agencies, mortgage-backed, asset-backed and non-dollar.
- Actively manages overall portfolio duration based on market conditions, normally within a range of 2.5 to 5 years.
- May use derivative instruments such as futures, options and credit default swaps, if explicitly authorized by client guidelines, in order to gain exposure and manage risk.

Investment Process

Step One: Duration and Yield-Curve Decision

Goal: Determine whether the bond market is cheap or expensive

- Emphasize real interest rates and formulate a long-term view
- Take advantage of yield curve opportunities

Step Two: Sector Decision and Bond Selection

Goal: Identify bonds with the highest risk-adjusted returns

- Focus on over/underweight sectors based on relative value and select bonds expected to perform well in dynamic interest rate and credit environments
- Focus on senior positions within the capital structure and use stress testing/scenario analysis to evaluate potential outcomes

Step Three: Risk Analysis and Control

Goal: Continually measure and control exposure to key risk factors

- Employ external and proprietary analytical tools to manage and control risk at security, sector and portfolio levels
- Avoid backward looking risk measures and "risk budgeting" approaches to portfolio construction

Total Strategy Assets

\$440.8 million

Inception Date: 11/1/1989

Intermediate Fixed Income vs. eVestment U.S. Intermediate Duration Fixed Income Universe†

Performance Attribution†

(Q4-2022)

| Sector | Impact % |
|------------------------|---------------|
| Duration Difference | 0.02 |
| Yield Curve Difference | 0.03 |
| Total Macro | 0.05 |
| Sector Selection | 0.49 |
| Security Selection | -0.16 |
| Total Selection | 0.33 |
| Fees | -0.06% |

Contributors and Detractors

- Macro factors contributed due to an above-index duration stance, as intermediate Treasury rates declined slightly.
- Yield curve positioning also contributed due to an underweight to the 1- to 3-year segment, which experienced a sharp increase in rates.
- Sector allocation contributed, primarily due to an overweight to the outperforming investment-grade (IG) corporates and significant non-index exposure to mortgage-backed securities (MBS), which outperformed during the fourth quarter.
- Security selection detracted overall, driven by underperformance of financials within the IG corporates sector. Security selection also detracted within the MBS sector, but the impact was partially offset by positive selection within commercial mortgage-backed securities (CMBS).

Sources of Excess Returns†

3-Year Annualized

10-Year Annualized

Attribution versus Bloomberg U.S. Intermediate Gov't/Credit Index. Indices do not reflect management fees or transaction costs. It is not possible to invest directly in an unmanaged index.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Performance figures are in U.S. Dollars and assume reinvested income for the entire period. Returns for periods less than one year are not annualized. Performance figures stated gross of fees do not reflect the deduction of management fees. Net performance is calculated after deducting a fee that represents the highest fee charged to any account in the composite. Performance results of clients would be reduced by the firm's management fees. For example, an account with a compounded annual total return of 10% would have increased by 159% over 10 years. Assuming an annual management fee of .30%, this increase would be 152%. The firm's management fees are detailed in its Form ADV Part 2A.

Totals may not equal due to rounding.

Unless otherwise stated, index returns represent total return (TR).

†Based on Gross of Fee Performance

| BBB | 16.0 | 15.2 |
| Below Investment Grade | 0.5 | 0.0 |
| Total | 100% | 100% |

Positioning and Rationale

- The weight in IG corporates was essentially unchanged quarter over quarter and remained overweight relative to the index, with exposure biased toward financials and industrials.
- The allocation to agency MBS increased modestly and continued to represent a significant proportion of the portfolio.
- Exposure to multi-family agency securities and other well-structured CMBS was unchanged.
- The weight in asset-backed securities (ABS) decreased quarter over quarter and remained at a low absolute level.
- Exposure to U.S. Treasuries declined and continued to represent a substantial underweight versus the index, to accommodate an overweight to IG corporates and non-index allocations to MBS and CMBS.
- Portfolio duration declined quarter over quarter but remained above that of the index, reflecting moderately attractive real rates.
- Yield curve exposure featured overweights to the 3- to 5-year and 10- to 15-year segments combined with underweights to the 1- to 3-year and 7- to 10-year segments.

*The bond quality ratings indicated are assigned by credit rating agencies Standard & Poor's, Moody's, and Fitch as an indication of an issuer's creditworthiness. Unless specified by client investment guidelines, the middle of three or highest of two credit quality ratings available from these rating agencies is used. Credit quality is subject to change. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase, hold or sell securities. They do not address the appropriateness of securities or the appropriateness of securities for investment purposes, and should not be relied on as investment advice.

The information provided is based on the aggregate characteristics of all securities held in a representative portfolio as of the date listed. The data provided in this report is for informational purposes only and should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any of the holdings discussed were or will prove to be profitable. Holdings may change daily and may vary among accounts. Data is obtained from third party sources and is believed to be accurate and reliable.

Firm Overview

Reams Asset Management, founded in 1981, is a fixed income investment management firm whose mission is to provide high-quality investment expertise and unmatched client service. We apply our consistent investment process across a range of strategies, seeking to take advantage of volatility and react opportunistically to price and valuation dislocation in the bond market. Reams offers clients customized solutions that seek to maximize risk-adjusted total returns over a full market cycle and across a range of fixed income strategies.

Reams Asset Management is a division of Scout Investments, which is a wholly owned subsidiary of Raymond James Investment Management. Raymond James Investment Management, which is itself a wholly owned subsidiary of Raymond James Financial, is a global asset-management company that combines the exceptional insight and agility of individual investment teams with the strength and stability of a full-service firm. Raymond James Investment Management's multi-boutique structure provides scalable business-support solutions to distinct and talented investment teams.

The Intermediate Fixed Income Composite invests primarily in investment grade securities, while maintaining an average portfolio duration of generally between two and a half to five years. The Bloomberg U.S. Intermediate Government/Credit Index is an unmanaged index comprised of US Treasury notes, federal agency bonds, US corporate debentures and dollar denominated foreign issues with maturities ranging between one and ten years. The eVestment U.S. Intermediate Duration Fixed Income Universe consists of U.S. fixed income products that primarily invest in high quality debt (as rated by Moody's or Standard & Poor's) with an emphasis on bonds with an intermediate duration. The expected benchmarks for this universe would include the Bloomberg Interm. Gov't/Credit, or Bloomberg Interm. Aggregate. Managers in this category will typically indicate a "Fixed Income Style Emphasis" equal to Gov't/Agency Only or Core and a "Product Duration Emphasis" equal to Intermediate.

eVestment, a Nasdaq platform, collects peer ranked, institutional investment data and information from active institutional managers, investment consultants, plan sponsors, asset managers, and other similar financial institutions and are believed to be reliable sources. Compliance Statement - Scout Investments claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Scout Investments has been independently verified by The Spaulding Group for the periods 2000-2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Intermediate Fixed Income Composite has had a performance examination for the periods 2002-2021. The verification and performance examination reports are available upon request. Prior to being acquired by Scout Investments, Reams Asset Management's compliance was verified for the period 1987 through 2009 by Ashland Partners & Company LLP. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Definition of the Firm - Scout Investments, Inc. is a registered investment advisor that offers investment management services for both managed accounts and mutual funds. Scout Investments is a wholly owned subsidiary of Raymond James Investment Management, which is in turn a wholly owned subsidiary of Raymond James Financial. Reams Asset Management is a division of Scout Investments. The firm was previously defined as UMB Institutional Asset Management, a subsidiary of UMB Bank, which managed both institutional and high net worth, trust, and estate assets. On July 1, 2009 the firm transitioned from UMB Bank and became a subsidiary of UMB Financial Corporation in order to focus on institutional investment management. On November 30, 2010, the firm acquired the advisory business of Reams Asset Management, LLC. On December 28, 2010 the firm changed its name from Scout Investment Advisors to Scout Investments. On November 3, 2017, Scout Investments was acquired by Raymond James Investment Management.

Composite Description - Intermediate Fixed Income Composite contains fully discretionary fixed income accounts and for comparison purposes is measured against Bloomberg Intermediate U.S. Government/Credit Bond Index as a general market indicator. This composite invests in the types of securities represented in its benchmark, generally limits security ratings to investment grade at time of purchase, and has a minimum duration range of +/- 15% around the benchmark. The minimum account size for this composite is \$20 million. Prior to January 1, 2002, the minimum account size was \$4 million. The Intermediate Fixed Income Composite was created November 1, 1989, and the composite inception date is November 1, 1989.

Performance - The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using highest management fee for this strategy. The internal composite dispersion presented is an equal-weighted standard deviation calculated for the fully discretionary, fee-paying accounts in the composite the entire year. The three-year annualized ex-post standard deviation, presented as a measure of volatility, measures the variability of the composite and the benchmark returns over the preceding 36-month period. Three-year annualized ex-post standard deviation of the composite and benchmark are not shown for periods where there were less than 36 months available. Gross returns were used to calculate the risk measures presented in this GIPS Report. Returns presented are time-weighted returns and are based on fully discretionary accounts under management. Past performance is not indicative of future results.

Fee Schedule -

| Vehicle | Management Fee |
|------------------|-----------------------------|
| Separate Account | .25% on first \$50M |
| | .20% on next \$50M |
| | Fees negotiable over \$100M |

Actual management fees incurred by clients may vary.

Availability - Lists of the firm's composite and limited distribution pooled fund descriptions, as well as a list of broad distribution pooled funds, are available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.
